GAME DAY

HUSKIES VS STFX X-MEN

StFX X-Men is 5-2 (Won 5). Danger level: live dog — respect it.

64

DANGER SCORE (24–95)

DO THIS

Our offence — where to attack

1st & long

Our plays here work 53% of the time (245 tries). Their defence is about average here.

2nd & short

Our plays here work 85% of the time (34 tries). Their defence is about average here.

Midfield 45–45

Our plays here work 58% of the time (126 tries). Their defence is about average here.

DON'T DO THIS

Our offence — where to stay away

Own 20–45

We are easy to guess here: we run 61% of the time. Their defence is strong here.

2nd & long

We are easy to guess here: we throw 78% of the time. Their defence is about average here.

3rd & short

We are easy to guess here: we run 100% of the time. Their defence is strong here.

WATCH OUT FOR

Their defenders who end our drives

Ty Ochitwa

29 tackles, 24 of them on plays that failed. Usually around Own 20–45.

Owen Watrych

56 tackles, 31 of them on plays that failed. Usually around Own 20–45.

Musa Kamara

52 tackles, 23 of them on plays that failed. Usually around Own 20–45.

2ND DOWN DECIDES THE DRIVE

We only get 3 downs, so 2nd down is the money down

On 2nd down our offence keeps the drive alive **55%** of the time. StFX X-Men lets other teams do it **55%**. A typical team: 53%.

Expected against them: **57%** (likely range ±5).

2ND DOWN	BEST CALL	RUN WORKS	PASS WORKS
short (1–3 yards)	**RUN**	83% ±10	59% ±20
medium (4–7 yards)	**RUN**	68% ±11	52% ±13
long (8+ yards)	**RUN**	53% ±12	41% ±7

"Works" means it gains at least 60% of the yards we need. We only get 3 downs, so a 2nd down that works keeps us off 3rd-and-long.

3RD DOWN: GO FOR IT OR KICK?

How often teams really go for it

On 3rd down most teams **kick instead of going for it**. Across the league only **34%** of 3rd downs are plays from scrimmage; the rest are punts and field goals.

GOES FOR IT ON 3RD &	1–3	4–7	8+	ALL
League	63% of 297	21% of 268	22% of 493	**34%**
Huskies	83% of 18	12% of 26	22% of 18	**35%**
StFX X-Men	44% of 25	7% of 14	17% of 29	**25%**

StFX X-Men goes for it 25% of the time and keeps the drive alive 53% when they do. Expect them to punt on most 3rd-and-longs, which makes **our 2nd-down defence** the key to getting the ball back.

64

TROUBLE INDEX

LIVE DOG — RESPECT IT

StFX X-Men — 5-2 (Won 5), 31.7 points and 388 yards a game, allowing 14.9. Of the 9 teams we could still meet they rank **6th most dangerous** to this specific team — measured by where our offence struggles against where their stop-makers actually live, not by their record.

MANAGEABLE LIVE DOG SERIOUS TROUBLE

WHAT MAKES UP THIS SCORE

the longer the bar, the more it adds to the danger

Their strengths hit our weak spots

Where their defence is strongest is where our offence has struggled. Compared with the other teams: worse than most teams (3 of 9 most dangerous).

49%

Their offence against our defence

How well their offence moves the ball compared with how many yards our defence gives up. Compared with the other teams: about average (6 of 9 most dangerous).

26%

How many points they score

Teams that score a lot are harder to beat, no matter the matchup. Compared with the other teams: about average (6 of 9 most dangerous).

25%

THE SCRIPT

BOTH CARDS ARE OUR OFFENCE AGAINST THEIR DEFENCE

Built by crossing **our** success rate in each situation against **their** concentration of stop-makers in that same square of grass and that same down. Attack where we are good and they are thin. Every September and October play counts the same.

OUR OFFENCE

GO HERE — WHERE TO ATTACK

Our success rate × their thin coverage · 441 charted plays

1st & long — 53% success

DOWN

245 plays (56% of our offence) · 7.7 yards per play · 41 big plays · we run it 65%

they cover it about normally — Owen Watrych makes 32 of his 56 tackles here (55% stop rate)

2nd & short — 85% success

DOWN

34 plays (8% of our offence) · 4.9 yards per play · 3 big plays · we run it 94%

they cover it about normally — Owen Watrych makes 7 of his 56 tackles here (55% stop rate)

Midfield 45–45 — 58% success

FIELD

126 plays (29% of our offence) · 8.7 yards per play · 20 big plays · balanced, 55% run

they cover it about normally — Musa Kamara makes 15 of his 52 tackles here (44% stop rate)

Opp 45–20 — 51% success

FIELD

98 plays (22% of our offence) · 5.9 yards per play · 14 big plays · balanced, 54% run

they are thin here (0.70× normal) — Musa Kamara makes 12 of his 52 tackles here (44% stop rate)

Own 10–20 — 64% success

FIELD

28 plays (6% of our offence) · 6.9 yards per play · 6 big plays · we run it 86%

they load it (1.60× normal) — Owen Watrych makes 7 of his 56 tackles here (55% stop rate)

OUR OFFENCE

STAY OUT OF TROUBLE — WHERE TO AVOID

Their loaded buckets × our weak spots × how often we call it

Own 20–45 — predictability 22

FIELD

142 plays (32% of our offence) · 7.1 yards per play · 22 big plays · balanced, 61% run

they load it (1.45× normal) — Owen Watrych makes 29 of his 56 tackles here (55% stop rate)

2nd & long — predictability 56

DOWN

86 plays (20% of our offence) · 7.8 yards per play · 11 big plays · we throw it 78%

they cover it about normally — Musa Kamara makes 14 of his 52 tackles here (44% stop rate)

3rd & short — predictability 100

DOWN

15 plays (3% of our offence) · 4.5 yards per play · 1 big plays · we run it 100%

they load it (2.50× normal) — Logan Steeves makes 4 of his 37 tackles here (51% stop rate)

Own 10–20 — predictability 72

FIELD

28 plays (6% of our offence) · 6.9 yards per play · 6 big plays · we run it 86%

they load it (1.60× normal) — Owen Watrych makes 7 of his 56 tackles here (55% stop rate)

1st & long — predictability 30

DOWN

245 plays (56% of our offence) · 7.7 yards per play · 41 big plays · we run it 65%

they cover it about normally — Owen Watrych makes 32 of his 56 tackles here (55% stop rate)

THEIR TRIGGER MEN

BOTH CARDS ARE THEIR DEFENCE

THEIR DEFENCE

WHO ENDS OUR DRIVES

StFX X-Men defence · ranked by disruption, not tackles

Ty Ochitwa — 44.6

29 tackles · 24 stops (83%) · 90% against the run

Lives in Own 20–45 on 1st & long, busiest in Q2

Owen Watrych — 41.4

56 tackles · 31 stops (55%) · 73% against the run

Lives in Own 20–45 on 1st & long, busiest in Q1

Musa Kamara — 31.9

52 tackles · 23 stops (44%) · 65% against the run

Lives in Own 20–45 on 1st & long, busiest in Q3

Tobi Sokunbi — 31.3

23 tackles · 15 stops (65%) · 100% against the run

Lives in Own 20–45 on 1st & long, busiest in Q4

Logan Steeves — 31.2

37 tackles · 19 stops (51%) · 95% against the run

Lives in Own 20–45 on 1st & long, busiest in Q3

THEIR DEFENCE

WHAT THEY DO TO US

Their best situations against our actual coverage

Opp 45–20 — 56% success

107 plays (25% of their offence) · 8.0 yards per play · 21 big plays · 46% run

we cover it normally — Giancarlo Wylie takes 22 of his 88 touches here

1st & long — 55% success

236 plays (56% of their offence) · 7.3 yards per play · 30 big plays · 35% run

we cover it normally

Midfield 45–45 — 55% success

121 plays (28% of their offence) · 6.7 yards per play · 15 big plays · 30% run

we cover it normally — Giancarlo Wylie takes 19 of his 88 touches here

2nd & short — 71% success

45 plays (11% of their offence) · 5.1 yards per play · 6 big plays · 80% run

we load it (1.72× normal)

Red zone — 10 to goal — 67% success

15 plays (4% of their offence) · 2.7 yards per play · 0 big plays · 67% run

we are thin here (0.20× normal) — Giancarlo Wylie takes 9 of his 88 touches here

8	**McMaster Marauders** OUA · 6-2 · 22.8 PPG	MITCHELL BOWL · if they win the Yates Cup	42
9	**Acadia Axemen** AUS · 1-6 · 14.7 PPG	ELIMINATED · 1-6	24

TROUBLE INDEX — our snap volume × their concentration of stop-makers × our failure rate in that situation, summed over all seven field zones and all nine down-and-distance buckets, plus their offensive efficiency against our yards allowed. Scaled 24–95 across every team we can still meet.

LOAD FACTOR — a defence's share of its own stops in that bucket divided by how often that bucket comes up across all 6,102 charted plays. 1.00 is normal. 1.40 means they deliver 40% more of their stops there than the situation itself explains — that is a defence that has decided to live there.

SEPTEMBER AND OCTOBER — every play from both months counts the same.

HOW TO READ THIS

Pick a down and distance. For each part of the field you see how often a team runs or passes, how often that play keeps the drive alive ("works"), and how the other team's defence does against it. Use the switch to flip sides and see the other team's offence against ours.

WHOSE OFFENCE

Our offence vs their defence

DOWN AND DISTANCE

Any 1st down

PART OF THE FIELD (FOR THE PLAYER LISTS)

Whole field

IN PLAIN ENGLISH

On **Any 1st down**, Huskies ran 251 plays: **66% runs and 34% passes.** Runs worked **59%** of the time (a typical team: 50%) and gained 7.2 yards a play. Passes worked **43%** (typical: 51%) and gained 8.6 yards a play. StFX X-Men lets runs work 40% of the time and passes 42%. **Best spot:** run when red zone (61% expected). **Hardest spot:** our side — even the better call (run) only works about 42% of the time.

WHERE ON THE FIELD	PLAYS	THEY RUN / PASS	RUN WORKS	RUN YARDS	PASS WORKS	PASS YARDS	DEFEN ALLOW RUN / PASS
Backed up (our goal to our 20)	22	91% / 9%	60% of 20	6.0	100% of 2	28.0	47% / 0%
Our side (our 20 to our 45)	84	71% / 29%	57% of 60	8.1	38% of 24	6.0	35% / 38%
Midfield (our 45 to their 45)	74	53% / 47%	59% of 39	7.9	43% of 35	10.3	50% / 64%
Plus territory (their 45 to their 20)	51	59% / 41%	53% of 30	6.6	43% of 21	7.0	38% / 34%
Red zone (inside their 20)	20	80% / 20%	81% of 16	4.8	50% of 4	6.8	29% / 40%

HOW TO READ THIS

Pick a down and distance. For each part of the field you see how often a team runs or passes, how often that play keeps the drive alive ("works"), and how the other team's defence does against it. Use the switch to flip sides and see the other team's offence against ours.

WHOSE OFFENCE

Their offence vs our defence

DOWN AND DISTANCE

Any 1st down

PART OF THE FIELD (FOR THE PLAYER LISTS)

Whole field

IN PLAIN ENGLISH

On **Any 1st down**, StFX X-Men ran 244 plays: **36% runs and 64% passes**. Runs worked **54%** of the time (a typical team: 50%) and gained 5.9 yards a play. Passes worked **56%** (typical: 51%) and gained 7.9 yards a play. Huskies let runs work 36% of the time and passes 51%. **Best spot:** run when red zone (61% expected). **Hardest spot:** backed up — even the better call (run) only works about 48% of the time.

WHERE ON THE FIELD	PLAYS	THEY RUN / PASS	RUN WORKS	RUN YARDS	PASS WORKS	PASS YARDS	DEFEN ALLOW RUN / PASS
Backed up (our goal to our 20)	19	63% / 37%	50% of 12	4.7	71% of 7	10.6	45% / 100%
Our side (our 20 to our 45)	70	30% / 70%	62% of 21	5.9	49% of 49	6.8	38% / 56%
Midfield (our 45 to their 45)	71	25% / 75%	44% of 18	4.2	58% of 53	8.2	17% / 46%
Plus territory (their 45 to their 20)	58	48% / 52%	54% of 28	8.5	60% of 30	9.3	38% / 46%
Red zone (inside their 20)	26	38% / 62%	60% of 10	2.7	56% of 16	6.4	63% / 29%
Whole field	244	36% / 64%	54% of 89	5.9	56% of 155	7.9	36% / 51%

"Works" = the play gains enough to keep the drive alive (half the yards needed on 1st down, 60% on 2nd, all on 3rd). Green = better than most teams, red = worse. Grey = fewer than 5 plays. Yards are per play.

STFX X-MEN: WHO GETS THE BALL

Any 1st down targets and carries

RECEIVER	THROWS ON THIS DOWN	CAUGHT	YARDS PER THROW
Ayres Perry	46	65%	8.9
Zachary Houde	22	77%	12.4
Jack Healy	17	67%	7.3
Payton Plesh	17	63%	6.0
Tyson Green	9	33%	2.7

RUNNER	CARRIES ON THIS DOWN	ALL CARRIES	YARDS PER CARRY
Giancarlo Wylie	53	88	5.4
Andrew Burton	14	27	5.3
Aidan Rossong	4	10	5.7
Aiden Rossong	4	9	13.6

Receiver numbers (caught, yards) cover the whole season, not just this down. The play-by-play does not say who was open or what route was run.

HUSKIES: WHO MAKES THE STOPS

Tackles on Any 1st down · sorted by this spot

DEFENDER	TACKLES ON THIS DOWN & DISTANCE	ALL TACKLES	ON PLAYS THAT FAILED
Devin Baumann	33	55	38%
M. Jean-Loesche	23	34	44%
Kallon Edwards	16	28	32%
D'Wayne Williams	14	25	48%
Wesley Cantor	14	20	45%

The play-by-play only shows who made the tackle or broke up a pass, so this shows who is near the ball, not who was covering whom.

Switch the side above to see Huskies's offence against StFX X-Men's defence. Change the opponent at the top to look at any team.

CALL SHEET

HUSKIES OFFENCE VS STFX X-MEN DEFENCE

How to read it: each box is a situation (down and distance down the side, field position across). The big word is the better option there — **PASS** or **RUN** — based on how often our passes and runs work and how often this defence stops them. The % is the chance it works. Under it: both options, the receiver we use most on that down, and how many plays we have there. Type your call in the box; it saves on this device.

STFX X-MEN DEFENCE — HOW THEY GET THROWN AT

HOW LONG, WHEN, TO WHOM

IN PLAIN ENGLISH

Teams complete 56% of their throws against the StFX X-Men defence (league 61%) and gain 6.4 yards a throw (league 8.0). That is better than average — the pass defence is a strength. They face the most throws in the second quarter. The receiver who hurt them most is Madden Ross (17 catches, 204 yards, for ACA). They have 5 interceptions and 17 sacks.

240 throws faced

56% catch % allowed lg 61%

6.4 yards per throw allowed lg 8.0

17 big plays allowed (20+) 7%

17 sacks made 7%

5 interceptions made 2%

WHEN THEY GET THROWN AT — BY QUARTER

What the play-by-play cannot tell us: formation, motion, personnel, who actually lined up across from whom, separation, time to throw, or pressure. A tackle or a break-up is the only coverage tag, and the man who makes the tackle is not always the man who was covering. Those need charted film.

WHERE THE DEFENCE CRACKS

HUSKIES OFFENCE VS STFX X-MEN DEFENCE

Where the **Huskies offence** should attack this defence. Each box is the chance a play works, based on how our plays have worked and how often this defence lets plays work. Click any team on the board to make them the opponent.

> **IN PLAIN ENGLISH**
>
> Each number is the chance a play "works" (about half the yards needed on 1st down, 60% on 2nd down, all of it on 3rd down). We compare how often the Huskies offence works in each spot, how often the StFX X-Men defence lets plays work there, and the league average. Overall this is a tougher-than-average defence for us: about 2.4 points fewer successful plays than usual. The run game is the better way in; passing is the harder road.

-2.4 pts overall success edge points better than vs an average defence

-9.0 passing edge

+2.0 running edge

39% how often we throw of called plays

THE CRACKS — WHERE TO ATTACK

biggest first · this season only (September and October)

Check on film: Cian Campbell — catches he tackles go for 17.5 yards (13 stops, 2 break-ups). Part of that is where he plays (deep men tackle deep), so confirm he is being beaten before you attack him.

Midfield · run — we succeed 67%, they allow 58% (league 54%) → expect 71%. We have 69 reps here.

Midfield · pass — we succeed 46%, they allow 60% (league 49%) → expect 57%. We have 57 reps here.

2nd & short · run — we succeed 85%, they allow 72% (league 75%) → expect 83%. We have 32 reps here.

Opp 45–20 · run — we succeed 61%, they allow 55% (league 55%) → expect 61%. We have 53 reps here.

CHANCE A PLAY WORKS, BY SITUATION

big number = expected chance it works · small +/− = points above or below an average matchup · green = good for us, red = bad · grey = fewer than 5 plays so no read · n = our plays / their plays

EVERY OPPONENT, STRONGEST FIRST

HOW WE MEASURE UP AGAINST BETTER TEAMS

Every other team, strongest first. A **positive edge** means our offence should work more often than against an average defence in the same situations; negative means it will be harder. This does not adjust for how strong our own schedule has been.

OPPONENT	RECORD	STRENGTH (POINTS AHEAD PER
Western Mustangs	6-2	+21.0
Windsor Lancers	6-2	+16.9
StFX X-Men ◀	5-2	+16.9
Queen's Gaels	7-1	+14.9
Guelph Gryphons	4-4	+12.5
Laurier Golden Hawks	4-4	+10.0
McMaster Marauders	6-2	+6.4
Ottawa Gee-Gees	4-4	+1.9
Acadia Axemen	1-6	-11.0
